

AS SEEN IN BOATING MAGAZINE

SOFT RIDE

OUR EDITORS HAVE COLLECTED PILES of family boating photos over the years. They're sitting around our offices in various places. They're on disks. They're stuffed in digital file folders. Oh, there are some unforgettable slides from Lake Powell in a box or cabinet somewhere. What we need are more pillows from SmArt Leather Designs. The one you see here is adorned with a picture we took with a point-and-shoot camera during a boating trip in the Florida Keys. We sent the image to SmArt Leather, and the company infused it onto the leather pillow cover, which was then given a topcoat. It hasn't faded or scratched since we got it last spring. And now, when we go belowdecks to nap, we can literally sleep on one of our most memorable boating experiences ever.
